actually one solid weldment of the heaviest materials. That's what makes them so strong. Even the supporting ribs are welded every inch where they attach to the body. Orchards and Vineyards Maximum flexibility in material application for orchards, vineyards and many other specialty applications.

MORE VERSATILE, TWICE THE POWER OF ANY OTHER GROUND DRIVE ...

The basics of lawn spreaders, sometime known as fertilizer spreaders, are similar regardless of the model. A bin or hopper holds the seed or lawn care product. As you move the spreader over your lawn, the product drops through an opening or series of openings onto the lawn. An application rate control lets you set how much material the spreader ...
