Space Collectibles, artifacts and memorabilia

Artifacts in space, or space archaeology The purpose of this project is to list all human-made objects that were sent in deep space, way beyond the Earth's orbit. Most of them are now orbiting celestial bodies such as the Sun, the planets or the moons while some are permanently settled on their surfaces and others are leaving the solar system.

Apollo 11: Smithsonian showcases stunning Moon landing ...

While artifacts were one of many topics discussed, the term carries a quite magnetic pedigree. So far, that meaning is of course fictional, or a misreading of actual features. There is perhaps most famously the monoliths from the movie "2001: A Space Odyssey" and then the myriad sightings of alien spacecraft that turn out to be anything but ...

Artifacts In Space | News | Astrobiology

During the late 1950s and early 1960s, the Soviet Union boasted an impressive succession of 'space firsts': the first satellite, the first dog, the first man, and the first woman in space were all sent there by the leading socialist country. The influence of the Sputnik and cosmonaut Yuri Gagarin went far beyond political leaders and military circles and was more than merely a link in the ...
