Dependent and independent variables are variables in mathematical modeling, statistical modeling and  
experimental sciences. Dependent variables receive this name because, in an experiment, their values are studied  
under the supposition or hypothesis that they depend, by some law or rule (e.g., by a mathematical function), on  
the values of other variables.

It can be shown that every continuous, nonzero solution of the functional equation  $(+) = ()$  is an exponential  
function,  $f(x) = a^x$ , with  $a > 0$ . The multiplicative identity, along with the definition  $a^n = a \times a \times \dots \times a$  for positive  
integers  $n$ , relating the exponential function to the elementary notion of exponentiation. The argument of the  
exponential function can be any real or complex ...
